Not that I didn't like it but that I just needed to sell some books one month. He said, "This is arcane!!" I said, "I think it is her PhD thesis." There's my review since I am not a Dutch speaker or

scholar but just someone who fell in love with the story because of Russell Shorto's account, "Island at the Center of the Earth." I'd say this is a worthy read for anyone who lives in or loves Albany, NY and wants to know its foundational history. The quick version is that the Dutch needed money to fight with Spain and beaver furs and pelts were worth a fortune and where Albany is, the Dutch erected Fort Orange and traded for beaver nearly to extinction. The "new world" was the resource after the population in Russia had been decimated by the same activity. As "Beaver Village" developed, many principles of government came into use that expressed Iroquois values as well as ideas from the Netherlands, which was forced toward democracy by its combination of water emergencies and regional independence. Those elements really became the paradigm we live with now as our ideal. Now I say this without being a perfect scholar of the matter, just a dabbler, so someone else may correct me and I won't take offense. This is what makes so compelling reading the Dutch adventures into what we now call New York State (because the British vanquished the Dutch and named it all after the Duke of York). Still, it was never a frontier suited for imperial governance and the British, we know, didn't keep it long. Janny Venema is a fine scholar and whether this work is arcane or for your coffee table maybe depends on where you live and what intrigues you personally. Without question, it is a finely detailed and thoroughly presented accounting of how things were in the middle 1600s. ps, my eclectic bookseller bought it. Includes a great deal of detail about the early residents and is essential for the family researcher. I have purchased 2 copies, one for home and one for the office as I refer to it so frequently. My compliments to the author, it is much appreciated.2 of 2 people found the following review helpful. beverwijckBy Thomas C. ClackThis is an excellent book. Extremely well researched. It tells how the present city of Albany in Upstate NY, got started. It's first Dutch inhabitants, the first settlers and all the information that has been gathered recently by translating the old documents that were lingering in the basements of NY State capitol buildings.It's fun to read what people did as professions, their early laws, the emancipation of women and even their clothes.Highly recommended for any history buff.

Beverwijck explores the rich history and Dutch heritage of one of North America's oldest cities--Albany, New York. Drawing on documents translated from the colonial Dutch as well as maps, architectural drawings, and English-language sources, Janny Venema paints a lively picture of everyday life in colonial America. In 1652, Petrus Stuyvesant, director general of New Netherland, established a court at Fort Orange, on the west side of New York State's upper Hudson River. The area within three thousand feet of the fort became the village of Beverwijck. From the time of its establishment until 1664, when the English conquered New Netherland and changed the name of the settlement to Albany, Beverwijck underwent rapid development as newly wealthy traders, craftsmen, and other workers built houses, roads, bridges, and a school, as well as a number of inns. A well-organized system of poor relief also helped less wealthy settlers survive in the harsh colonial conditions. Venema's careful research shows that although Beverwijck resembled villages in the Dutch Republic in many ways, it quickly took on features of the new, "American" society that was already coming into being.

"A sweeping, groundbreaking book on the city's earliest history."Janny Venema has written an exemplary work that sets a high standard for future research into the communities of New Netherland. As further Dutch records become available, it is to be hoped that other scholars will follow her impressive example and apply her thorough methodologies to many other areas of New Netherland.
