CARRYING THE CHALICE FORWARD

This is a book which should be in every public library. This is a book which should be part of every school's curricula because (a) it is beautifully written and (b) it emphasises the need for us to recognise that we are all at one with each other (regardless of ethnic origins) in our primitive mortal needs. This book transcends religions. It is a book about humanity. It touches the soul. It fires the imagination. It enriches our understanding of life. I wish I could think as Martin thinks. I wish I could live as Martin spells it out in his powerful prose. Alas, like the most of mankind, I have fallen by the wayside but, if I had to follow any teacher, it would be Martin because every word he writes comes straight from his heart. I carry his book with me so that others might dip into it and become as spell-bound as I have been by the all-bracing concept of humanity it portrays - a humanity freed from religious dogma. I keep dipping into it because it enriches me as no other book has ever done. It is truly inspirational. Buy it. It will be the best decision of your life.

The author did a good job telling his point of view about Native peoples' beliefs and the importance of protecting Mother Earth. The book as well talked about marriages with Native people and their bloodlines. I have learned a few new things about Native culture from reading this book and it has sparked my interest to learn more about their culture. I think that there is a lot that people can learn from Native culture, especially learning from their beliefs of protecting nature, living together in peace as brothers and sisters, and working together as a family to protect Mother earth. The author also writes the book from his view about his personal spiritual journey. Great book to read and it was very informative about Native Culture from both historical and cultural perspectives.

Following the previously unsaid early histories of the forming of America and the modern re-emergence of the Metis as the inheritors of the true peace and power of the New World. The re-kindling of their age-old alliances with the Celtic lords of Ireland, Scotland, Normandy and elsewhere has brought forward an alternative - and, hopefully, less prejudiced view of the purpose and creation of the New World. This book offers an inside look, from an indigenous Metis perspective, of the old noble, sacred, holy and main indigenous families of the Americas and Europe in their little known agreements to travel, trade and share their new formed lives together in this wonderful land we call Creation. New understanding is gained from looking at the challenges currently facing all of humanity in our urgent need to balance the forces of nature against the greed of continual conquest and ongoing subjugation of the free peoples of the world. The interconnections of these families and the teachings of the Great Laws of Peace, as handed down through these indigenous teachers, are the true inheritance of the New World and are still readily available to all families alive today. The perseverance of the St. Clair, Jacobite, Lorraine and other bloodlines constantly overshadows the English and Vatican agendas showing plainly how the Metis have become the modern force to be reckoned with in restoring true peace and freedom to humanity.

Schema by Lucy Dolan, Though not explicitly a history book, it definitely challenges dominant notions of 'the discovery' of America, as well as notions of what it means to be aboriginal. The bloodlines of the Kings of Tara ...
