A must read.3 of 5 people found the following review helpful. This is an amazing series of books - well researchedBy Tom H.This is an amazing series of books - well researched, honest and very important. Our World is changing quickly and this information is a must read for anyone

who is interested in what's going, how we got here and where we are headed as a species and planet. As it turns out, it's up to us! Penny Kelly's background in engineering along with her work ethic and amazing ability to synthesize enormous amounts of information into an easy to read and understand format is appreciated. She is authentic, at times vulnerable and always sincere. Mind, Space, Consciousness, Energy, Intelligence, Thought - it's all explained, really well. Enjoy the read.

When premier researcher into consciousness, Penny Kelly, loses her mother, her sister, her research associate, her hero, and her religion all in one year, she begins a search for a new anchor and something to believe in. What follows is a journey into a world of tangled information about the history of humanity that encompasses 40,000 years. As she works her way through one set of shocks, lies, and disappointments after another, Kelly begins to see threads of connection to the ancient civilization of the Great Goddess, which has been both recognized and well-documented...and well-hidden. As these threads begin to weave themselves into a stunning picture of a lost civilization, she realizes why this history has been hidden. This is a no-holds-barred book about religion, sex, power and consciousness. It is one that could not have been written without Kelly's extensive experience with kundalini, her wide-ranging research into consciousness, and her critical ability to synthesize and present information. It presents an entirely different view of our history, what we used to be, why we are here, and where we can go if we choose to. Consciousness and Energy, Vol. 3 is the third in a trilogy of books presenting extraordinary research into consciousness, energy, and human transformation.
