Zecharia Sitchin : cosmic code: Book VI of the Earth Chronicles before purchasing it in order to gage whether or not it would be worth my time, and all praised cosmic code: Book VI of the Earth Chronicles:

1 of 1 people found the following review helpful. I love all of Sitchin's books By Customer I love all of Sitchin's books. This was one of two needed to complete the 'Earth Chronicles' series. I'm a big fan of the 'Ancient Aliens' tv series and

the whole ancient astronaut theory so this was a must. All of these are informative and he really did his homework. Like Erich Von Daniken, Zecharia Sitchin shared the same ideas, but from a slightly different perspective. Each one is basically a different culture or civilization like Sumeria or Egypt and their 'gods'. These are facts and science-not fiction. 1 of 1 people found the following review helpful. read most of Sitchin books the first half of this ...By Omer Yavetz read most of Sitchin books the first half of this one was interesting second part not so, mostly thing I read in his other books not a must 2 of 2 people found the following review helpful. The Opening of the Mind's Eye By DVUSMCM Must read the Complete Series in order to understand the concept that covers 460,000 + years to present and at first you will think he is crazy but at some time you will question your belief system then by the conclusion you will know where you stand in your belief system and only Question is WHY? he does not answer that he leaves it to you and your belief system!!!

Many thousands of years ago, a group of extraterrestrials from another planet guided the evolution of life on Earth determining the existence and nature of humankind as we know it today. How did the master builders from the stars construct the miracle called man? Is the DNA that is at the core of all life in the universe a "cosmic code" that links Earth to heaven and man to God? In this sixth volume of The Earth Chronicles, Zecharia Sitchin unveils writings from the past to decipher prophecies, and reveals how the DNA-matched Hebrew alphabet and the numerical values of its letters serve as a code that bares the secrets of mortal man's fate and mankind's celestial destiny.

.com One of the charms of Zecharia Sitchin is his tendency to take ancient writings as fact as opposed to myth. For example, according to clay tablets discovered by archeologists, Gilgamesh, a king of ancient Sumeria, was punished by the gods for raping female subjects on their wedding day--a particularly naughty, though not uncommon, pastime of ancient royalty. Snickering, the tricky gods created a double of him, which, as you can imagine, created havoc in the king's life. Some time later, directed by his goddess mother, Gilgamesh walked with his double to Lebanon to attain immortality. Sitchin ponders that perhaps the double had superhuman strength and en route built a second Stonehenge discovered in the Golan Heights by Israelis during the 1967 Six Days War. Hmmm. As Sitchin concedes, there's really no way to tell who actually built this hoary structure, but the in-depth archeological and historical research gathered here to support his musings concerning an extraterrestrial secret code to construct humankind is fascinating beyond belief. --P. Randall Cohan Readers interested in the Kabbalah and in numbers mysticism will find Sitchin provocative. (UFO Magazine) In terms of scholarship and research, his books are light years away from those other popular authors. (New York Tribune) From the Inside Flap Dear Reader, The Earth Chronicles series is based on the premise that mythology is the depository of ancient recollections, that the Bible should be read literally as a historic-scientific document, and that ancient civilizations were the product of knowledge brought to Earth by the Anunnaki--Those who from Heaven to Earth came. Complementing each other and serving to bring the saga of gods and humans on Earth ever closer to our time, each book of the series looks at this awesome tale from a different perspective. The 12th Planet, the first book of the series, brings to life the Sumerian civilization and presents millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and the landings of the Anunnaki on Earth every 3,600 years. The Stairway to Heaven, the second book, incorporates ancient Egyptian evidence to show that the gateway between the mortal and the divine was a spaceport in the Sinai Peninsula, with the Giza pyramids and the Sphinx serving as beacons for the landings. The Wars of Gods and Men, the third book, additionally embraces Canaanite, Hittite, and Hindu sources to include in these investigations the incidents of the Tower of Babel and the upheaval of Sodom and Gomorrah, concluding that nuclear weapons were used on Earth 4,000 years ago. The Lost Realms, the fourth book, transports readers to the pre-Columbian civilizations and ancient empires of the Americas, revealing hitherto unrecognized golden links between ancient Near Eastern civilizations and the cities of the gods of the Olmecs, Mayas, Aztecs, and Incas. When Time Began, the fifth book, explores ancient knowledge of Heaven and Earth and the interwoven cycles that gave rise to astronomy, the zodiac and astrology, and stone calendars such as Stonehenge, revealing the secret of New Ages past and future. And The Cosmic Code, the sixth book in the series, explains how the secrets of humankind's celestial teachers were encoded in the Bible and other sacred and hidden books--a cosmic code that links Earthlings to their cosmic roots. In the years since each book was published, new scientific discoveries have provided mounting corroboration of the series incredible and unorthodox science-based conclusions. This accumulation of discoveries and the origins of humankind and the solar system are further discussed in the companion books Genesis Revisited and Divine Encounters. I trust that modern science will continue to confirm ancient knowledge. Zecharia Sitchin was born in Russia and grew up in Palestine, where he acquired a profound knowledge of modern and ancient Hebrew, other Semitic and European languages, the Old Testament, and the history and archaeology of the Near East. A graduate of the University of London with a degree in economic history, he worked as a journalist and editor for many years prior to undertaking his life's work--The Earth Chronicles. One of the few scholars able to read the clay tablets and interpret ancient Sumerian and Akkadian, Sitchin based The Earth Chronicles series on the texts and pictorial evidence recorded by the ancient civilizations of the Near East. His books have been widely translated, reprinted in paperback editions, converted to Braille for the blind, and featured on radio

and television programs.
