N. J. Demerath III : Crossing the Gods: World Religions and Worldly Politics before purchasing it in order to gage whether or not it would be worth my time, and all praised Crossing the Gods: World Religions and Worldly Politics:

Crossing the Gods examines the sometimes antagonistic and sometimes cozy but always difficult and dangerous relationship between religion and politics in countries around the globe. Eminent sociologist of religion Jay Demerath

traveled to Brazil, China, Egypt, Guatemala, India, Indonesia, Israel, Japan, Northern Ireland, Pakistan, Poland, Sweden, Turkey, and Thailand to explore the history and current relationship of religion, politics, and the state in each country. In the first part of this wide-ranging book, he asks, What are the basic fault lines along which current tensions and conflicts have formed? What are the trajectories of change from past to present, and how do they help predict the future? In the book's second part the author returns home to focus on the United States, the only nation founded specifically on the principle of a separation between religion and state and examines the extent to which this principle actually holds and the consequences when it does not. Highlighting such issues as culture wars, violence, globalization, and the fluidity of individual religious identity, Demerath exposes the provincialism and fallacies underlying many of our views of religion and politics worldwide. Finally, Demerath examines America's status as the world's most religious nation. He places that claim within a comparative context and argues that our country is not more religious but differently religious. He argues that it represents a unique combination of congregational religion, religious pluralism, and civil religion. But the United States also illustrates the universal tendency for the sacred to give way to the secular and for the secular to generate new forms of the sacred.

"Demerath rides a global highway from South America to the Middle East, India and beyond, discovering the diversity of religious responses to the social and political crises of the contemporary age. This is a brilliant demonstration of a newly emerging global sociology of religion. A journey worth taking, with intellectual rewards every step of the way." - Mark Juergensmeyer, author of *Terror in the Mind of God: The Global Rise of Religious Violence* "Fresh, enriching, challenging and witty: *Crossing the Gods* is the first truly sociological approach to contemporary world religions and their social and political contexts. A major contribution." - Helen Rose Ebaugh, professor of sociology, University of Houston

About the Author: N. J. Demerath III is a professor of sociology at the University of Massachusetts at Amherst and the author of eight books, among them *Sacred Companies: Organized Aspects of Religion and Religious Aspects of Organizations* and *A Bridging of Faiths: Religion and Politics in a New England City*. He is a former president of the Society for the Scientific Study of Religion.
