This publication contains detailed official national accounts data for over 200 countries or areas of the World for the years 2002 to 2014. It is a valuable source of information on the state and structure of economies worldwide. The data for each country or area are presented in separate chapters with uniform table headings and classifications as recommended in the System of National Accounts 1993 (1993 SNA). Each country chapter also contains a write-up on the methodology and data sources which are used to compile the national accounts. A summary of the SNA conceptual

framework, classifications, and definitions is also. It also contains statistics on gross domestic product.
