From Government Printing Office : Nautical Almanac: 2017 before purchasing it in order to gage whether or not it would be worth my time, and all praised Nautical Almanac: 2017:

Contains the following data tabulated at hourly intervals to a precision of 0.1 arcminute: the Greenwich hour angle and declination of the Sun, Moon, and navigational planets; the Greenwich hour angle of Aries; positions of the navigational stars; rise and set times of the Sun and Moon for a range of latitudes; and other data. Each edition also

contains a sight reduction table; sight reduction formulas; and various correction tables for sight reduction. There is a useful concise sight reduction form at the back of the book. Each edition contains data for one year and is published six months or more in advance of the edition year. This book is still the standard resource for marine celestial navigation for the U.S. Navy.
