Pilgrimage: Mongols on Wutaishan (China), 1800-1940 (Brill's Inner Asian Library):

Nomads on Pilgrimage: Mongols on Wutaishan (China), 1800-1940 is a social history of the Mongols' pilgrimages to Wutaishan in late imperial and Republican times. In this period of economic crisis and rise of nationalism and anticlericalism in Mongolia and China, this great Buddhist mountain of China became a unique place of intercultural exchanges, mutual borrowings, and competition between different ethnic groups. Based on a variety of written and visual sources, including a rich corpus of more than 340 Mongolian stone inscriptions, it documents why and how Wutaishan became one of the holiest sites for Mongols, who eventually reshaped its physical and spiritual landscape by their rites and strategies of appropriation.

'Charleux's book is an erudite and prodigiously detailed study of pilgrimages to Wutaishan a Buddhist sacred mountain in China's Shanxi province made by Mongols during the later Qing and early Chinese republican periods (...) a wonderfully detailed and meticulously work of scholarship, likely to have a significant interdisciplinary appeal.'
