Great book of famous people that have expired By Harrison Ford Great book of famous people that have expired young however that whom ever published it missed several other people that have expired over the same time covered in the book. One actor that has not such a glorious acting career as those referred to in the book is Christopher Pettiet who died of a drug over dose just like River Phoenix although born six years later than River Phoenix and Christopher Pettiet also died in early twenties. There are many more famous people that have died young that are not mentioned in the book that are not as well known as those in the book

but should have been added.0 of 0 people found the following review helpful. informative issueBy LionheartI was able to learn more about the deaths of these famous stars by reading this book.
