OsborneI bought this textbook for my Cultures of Asia class in college and I thought this book was pretty good, it had a different set of authors for each chapter but it was definitely a hard read. It wasn't hard to understand and there was a lot of information, a good learning experience but the book itself makes you tired. The chapters were too long and they had too much information in each chapter. The book is set up so that each chapter is a different Asian country; but there is just so much information that it was hard to stay motivated to read the entire chapter! I still got an A in the class, I did enjoy the class but this book, if you don't need it for a class it's probably not a good buy.The textbook arrived quickly and in perfect condition and I would definitely use the seller again.0 of 0 people found the following review helpful.

Satisfied Customer  
By Nefertiti  
The product arrived promptly and the description of the product was accurate. I needed a particular book for school, and the price of a brand new book was a bit too expensive for me. I did not need a new book- just something to survive the spring semester. I was very pleased with the price of the used item that I ordered. The product came quickly and the condition of the book was better than what I expected, as the price was significantly lower than the price of the book's new price. No markings, torn pages, dog-eared pages or highlighter marks. As I have stated, the product arrived quickly and was in good condition. I would buy from this company again in the future!

By Larry  
The reading is fun. Each section makes enough interesting points to keep the variety of the subject. Worthwhile and fun!

This textbook is the only single book available at this time to highlight the importance of this region of the world. Each chapter in the book is written by anthropologists who have done ethnographic research in each country discussed. Chapters include material on the geography, prehistory, languages, demography, history, and discussions of the contemporary economy, family, gender, ethnic, political, and religious developments in these various countries.
