This is an excellent read, a must for any student of Middle East studies or Islam. Mr. Roberts has successfully conveyed a number of ideas in a way that is accessible to most audiences.

Amidst daft rhetoric and media hysteria, the relationship between contemporary politics and the religion of Islam is hotly debated. *Political Islam and the Invention of Tradition* provides timely, unique and informed insight into the phenomenon of "political Islam" by tracing its historical development in the context of the modern world historical theme of the asymmetric development and modernization of different societies.

From the Back Cover "This study provides both an important and necessary historical contextualization and a clear analysis of the political alternatives in the Middle East and Muslim world in the 21st century. The second decade of the 21st century is emerging as a time of significant change in political and societal institutions in the region. People are speculating about the end of the political order that was created at the end of World War I, and Roberts's analysis provides readers with a good guide to understanding important dimensions of these transformations."- Dr. John O.
