By Nathan Rein
McCutcheon develops his ideas further than ever in this slim volume. Concise, challenging, and provocative. Guaranteed to tick you off, if you care about the theory of religion.

Since the events of 9/11 the representation of Islam has increasingly come adrift from its actuality. Scholars and pundits have effectively demonised a whole faith by wilfully apportioning blame and by ignoring the differences within the Islamic movement. 'Religion and the Domestication of Dissent' examines how the classifications we use to name and negotiate our social worlds - notably 'religion' - are implicitly political. The study ranges widely from contemporary film and art to the War on Terror and will be invaluable to readers interested in the politics behind the portrayal of dissenting religious groups.

"An important, provocative and challenging book." - Religion
