Mr Sunny Kodwani : Religious movements in historical India before purchasing it in order to gage whether or not it would be worth my time, and all praised Religious movements in historical India:

The cult of bhakti was followed by a host saints of northern India. The moving spirit were Ramananda, Kabir, Nanak, Chaitanya and others. The Bhakti movement associated with the southern group was more scholastic than popular, which was not the case with the northern group. The bhaktas of the latter group did not ponder over the subtle

questions of metaphysics. They were essentially eclectic, broad-minded and latitudinarian in their views and outlook. Ramanuja (twelfth century): The earliest exponent of the Bhakti movement was the great Vaishnava teacher Ramanuja who flourished in the early years of the twelfth century in the South. The next leader of the Bhakti movement was Nimbarka, a contemporary of Ramanuja. He believed in the philosophy of Vishistadvaita and laid emphasis on surrender to God.
