that this major contribution to the history and culture of Andalusian Spain during the heyday of high medieval Muslim culture is available in a paper edition, this text should be considered for course work as there is quite simply no other resource like it in English that attempts to provide a fulsome account of Islam in Spain.

The civilization of medieval Muslim Spain is perhaps the most brilliant and prosperous of its age. It has proved essential to the direction which civilization in medieval Europe took. In this monumental, collected work, all major aspects of Islamic civilization in medieval Spain, including its influence on medieval Christianity, are dealt with in a comprehensive manner. This indispensable compendium is highly recommended to experts and to everyone interested in the legacy of Muslim Spain. It offers a variety of information and presents it in an encyclopedic fashion, combining a high level of scholarship and a wide range of subject that bring this period of Arab-Islamic history to life.
