Thanks to Helen Benedict from veterans and active duty.By FarfromthefarMaybe someday people will listen and really hear the truth even if it takes some glitter off the military image. The military service members are more important than the military

reputation. Military Service members do not have the normal rights a citizen does. They are under the Military Code of Justice instead and are not innocent until proven guilty and have no real power to be heard or hope of being believed. That was true in 1975 and remains true today because no one wants to be bothered and they somehow imagine pristine justice is available under the code.

By Jill Made me angry -- first, the abhorrent behavior towards the women by the men who are supposed to be on their team, and second, for the horrible conditions to which all soldiers were exposed so Halliburton (esp KBR) could improve their bottom line. Totally disgusting. But I feel better for having been exposed to this painful knowledge. Much gratitude to Helen Benedict for writing this, as well as the women who were courageous enough to speak with her.

By N.S. First I have to admit I'm writing this review as a mere civilian and outsider: I'm a guy living and working in Middle Europe, have never served in the army, never used a weapon, and never witnessed any armed conflict or violence. Still, I felt I needed to read this book, about women who served in a war that almost nobody in the world wanted to happen, apart from the Bush administration co... The book gives an insight into the life of five women, who joined the armed forces of the U.S., and who did their best to serve their homeland. As a civilian, I was reading it as a rare first-hand experience of a war, which most of us only watched on TV. We knew that soldiers and Iraqi people are getting killed almost every day, but for many of us the whole thing just seemed so distant. And now it came very close, and real. Honestly, the personal stories that these women told have really touched me. I often felt deeply involved. While I was reading the harder parts of the book - harsh living conditions, sicknesses, mortar attacks, fights - I constantly wished I could help these girls and women somehow. Although I haven't experienced such extreme circumstances in my own life, I could imagine their situation, and it was so moving when they talked about their struggles, their pain (both physical and mental). I kept on thinking to myself, "They did not deserve this". It was also a delusion getting to know how USA, the world's strongest economic and military power, treats some (many?) of its own soldiers, during and after the war, in which they risked their own lives. And one more important aspect I'd like to note: having read this book, I'd never think the same way about war, armed forces, men and women as before. I must have learned something. There were only two things which disturbed me a bit. First, as earlier reviewers have already noted, it tends to focus mainly on the problems, difficulties and struggles, while happier periods are summarized in like one or two short sentences, to give room for the next problem. Second, I had a slight feeling that the stories deliberately end (or get cut off) in sadness, as if Benedict wanted to "over-emphasize" their drama at the end of her book. I would have welcome some kind of epilogue or afterword. All in all, this book made a big impression on me, despite its slight pessimism and bias I've mentioned. It was well worth reading. I would recommend it to anybody who'd like to get an insight into the lives of (female) soldiers of today.

The Lonely Soldier--the inspiration for the documentary The Invisible War--vividly tells the stories of five women who fought in Iraq between 2003 and 2006--and of the challenges they faced while fighting a war painfully alone. More American women have fought and died in Iraq than in any war since World War Two, yet as soldiers they are still painfully alone. In Iraq, only one in ten troops is a woman, and she often serves in a unit with few other women or none at all. This isolation, along with the military's deep-seated hostility toward women, causes problems that many female soldiers find as hard to cope with as war itself: degradation, sexual persecution by their comrades, and loneliness, instead of the camaraderie that every soldier depends on for comfort and survival. As one female soldier said, "I ended up waging my own war against an enemy dressed in the same uniform as mine."

In The Lonely Soldier, Benedict tells the stories of five women who fought in Iraq between 2003 and 2006. She follows them from their childhoods to their enlistments, then takes them through their training, to war and home again, all the while setting the war's events in context. We meet Jen, white and from a working-class town in the heartland, who still shakes from her wartime traumas; Abbie, who rebelled against a household of liberal Democrats by enlisting in the National Guard; Mickiela, a Mexican American who grew up with a family entangled in L.A. gangs; Terris, an African American mother from D.C. whose childhood was torn by violence; and Eli PaintedCrow, who joined the military to follow Native American tradition and to escape a life of Faulknerian hardship. Between these stories, Benedict weaves those of the forty other Iraq War veterans she interviewed, illuminating the complex issues of war and misogyny, class, race, homophobia, and post-traumatic stress disorder. Each of these stories is unique, yet collectively they add up to a heartbreaking picture of the sacrifices women soldiers are making for this country. Benedict ends by showing how these women came to face the truth of war and by offering suggestions for how the military can improve conditions for female soldiers--including distributing women more evenly throughout units and rejecting male recruits with records of violence against women. Humanizing, urgent, and powerful, The Lonely Soldier is a clarion call for change.

Benedict's book, filled with compelling and heartbreaking stories, is a groundbreaking testament to the bravery, resilience, and almost insurmountable obstacles faced by women stationed in Iraq. One: The Lonely Soldier

On a blustery night in March 2004, I joined a small crowd in New York City to honor the citizens and soldiers who had died in the first year of the Iraq War. Among us were children, Vietnam veterans, and a mother whose young soldier son had just been killed; she held his wide-eyed picture up throughout the vigil. Huddling together for warmth, we lit candles and read aloud the names and ages of the dead. After each name, a woman struck a huge drum, making a hollow thud that chilled us more than any cold. We began with the soldiers: Christian Gurtner, 19. Lori Ann Piestewa, 23. . . . Once 906 American names had been read, a young man took the microphone and read the names of some of the many thousands of Iraqis who had been killed thus far: Valantina Yomas, 2. Falah Hasun, 9. . . . infants and teenagers, mothers and fathers, toddlers and grandmothers It took at least an hour to read all those names, and afterwards the young man explained why he knew how to pronounce them: Im a soldier just back from Iraq, he said, and were being used as cannon fodder. Were being sent into war without body armor or decent vehicles to protect us. And most of the people who are dying in this war are civilians. I was taken aback. This was the first anniversary of the U.S. invasion, and it was unpopular for anyone to criticize the way the war was the lonely soldier being run, let alone someone who had fought in it. Surely this young soldier was going to be called a traitor by his comrades. So I began to follow the other few veterans who were speaking out like him, curious to see what they were up against, which is how I found army specialist Mickiela Montoya and learned about women at war. I first saw Mickiela in November 2006, standing silently in the back of a Manhattan classroom while a group of male veterans spoke to a small audience. Sentiment had shifted by then, and a poll had just been released showing that the majority of soldiers were now highly critical of why and how the war was being fought. Among women serving in Iraq at the time, 80 percent said they thought the United States should withdraw within a year, and among men, 69.4 percent agreed.¹ Wondering how this young woman might feel, I approached her. Are you a veteran too? I asked. Yes, but nobody believes me. She tucked her long red hair behind her ears. I was in Iraq getting bombed and shot at, but people wont even listen when I say I was at war because Im a female. Ill listen, I said. And soon I was listening to all sorts of female soldiers from all over the country who wanted to tell their stories. In the end, I interviewed some forty soldiers and veterans for this book, most of them women. The majority had served in Iraq, but a few had been deployed to Afghanistan or elsewhere. I included a variety of ranks, from privates up to a general; all military branches except the Coast Guard; and soldiers on active duty as well as those in the reserves and the National Guard. I thus use the word soldier to mean members of the Marine Corps and air force as well as the army. Some women had only positive things to say about their service: it had given them a responsibility they never would have found in civilian life, and they were proud of what theyd accomplished. This was particularly true of soldiers in medical units. Captain Claudia Tascon of the New Jersey National Guard, who immigrated to the United States from Colombia at age thirteen and served in Iraq from 2004 to 2005, was one of these. Because Im more in the curing business than the killing business, Ive seen the good of what weve done. We had dentists and doctors put themselves in harms way to help kids in villages. I was in charge of a warehouse, supplying medical and infantry units all over northern Iraq, and I was also supplying the Iraqi army, who had nothing for wounds except saline solution. So I cant say anything bad about the the lonely soldier war. Then she added, In the civilian world, youd never have a twentythree- year-old in charge of peoples lives and millions of dollars worth of supplies like I was. Marine Corps major Meredith Brown, who comes from New Orleans, was so proud of her service in Iraq that she said she would go back in a flash if called, even though shed had a child since her return. If I got killed out there, my son would understand that Id died to protect him and other Americans from terrorists coming to our backyard. But most of the Iraq War veterans I talked to were much more ambivalent. Some praised the military but considered the war disastrous, others found their entire service a nightmare, while yet others fell in between. From all these women, I chose to feature five whose stories best reflected the various experiences of female soldiers in Iraq,

although I have included the stories of others as well. As different as these soldiers are, they all agreed to be in this book because they wanted to be honest about what war does to others and what it does to us. Above all, they wanted people to know what it is like to be a woman at war.
