my time, and all praised *The Long European Reformation: Religion, Political Conflict, and the Search for Conformity, 1350-1750 (European History in Perspective)*:

Peter G. Wallace adeptly interweaves the influential events of the early modern religious reformation with the transformations of political institutions, socio-economic structures, gender relations, and cultural values throughout Europe. In this established study, Wallace: * examines the European Reformation as a long-term process* reconnects the classic sixteenth-century religious struggles with the political and religious pressures confronting late medieval Christianity* argues that the resolutions proposed by reformers, such as Luther, were not fully realised for most Christians until the early eighteenth century. Incorporating the latest research, the second edition of this essential text now features a new chapter on the Reformation and Islam, expanded discussion of gender issues, and a helpful glossary.
